Introduction

Welcome

Whether you're a seasoned veteran or brand new to Matrix™, we'd like to welcome you to Matrix™ 11.

We understand that, at times, new or updated technology can be challenging so, we have created this Quick Start Guide to help.

This guide is designed to make your experience with Matrix™ 11 as smooth and seamless as possible.

With Matrix™ 11, you'll have access to a wide range of powerful new features and updated tools that will help you increase productivity and efficiency.

Matrix™ 11 is mobile friendly, cross-browser compatible and has long been considered, by many, the most intuitive property listing software available today.

Whether by developing efficiency-rich features or creating in-depth tutorials, we remain committed to bringing out the best in you.

Matrix™ Desktop Compatibility

Matrix™ X is compatible with the latest browser versions supported by mainstream operating systems. Operating systems and browsers such as Windows XP, Windows Vista and Internet Explorer 8 and 9 (IE8, IE9) are no longer in mainstream support. Anyone using a previous version of these browsers will see a warning at login to encourage upgrading. Browser-related issues that can't be resolved by upgrading to the latest version will be reviewed and resolved on a priority and best-effort basis. CoreLogic will support upgrades to browsers as soon as reasonably practical following availability of the new browser version in new retail computers.

Desktop users who choose to use Internet Explorer (IE) on Windows 7 and Windows 8 can upgrade to IE11. Windows 10 users can use IE11 or Edge Browser. Firefox and Chrome automatically update to their most recent versions regardless of underlying operating system. Matrix™ supports the following desktop browsers:

- Internet Explorer 11 and Edge Browser
- And the most recent versions of:
 - Safari
 - Firefox
 - Chrome Mobile
 - Chrome
 - Android Browser
 - Safari Mobile

Matrix™ Mobile Compatibility

iPad and Android tablet users should install the most recent version of their browser.

Matrix™ Mobile supports the following browsers:

- iOS Safari
- iOS Chrome
- Android Browser
- Android Chrome

Defects reported against other mobile platforms will be fixed on a best-effort basis.

A few things you should know.

Matrix™ is currently used by over 750,000 real estate professionals worldwide. However, because no two MLS's or Associations are exactly alike, some of the fields, data and images used in this guide may differ slightly from the system that you're currently working on. Rest assured, however, that the concepts are the same and that you will easily recognize the ones used here with those of your own.

Secondly, Matrix™ is an online MLS software system so you must be using an active Internet connection.

Third, all highlighted controls in Matrix™ represent mandatory fields that must be completed before you are able to proceed with that feature.

Finally, if after using this guide, you're still unclear about anything you read, we invite you to check out the video tutorials listed in your system's, "Help" section, in the Learning Lab or on YouTube (www.youtube.com/@CoreLogicMatrix).

Enjoy.
